

Quanika

FACE ID

One Platform,
Multiple Solutions,
Unlimited Possibilities.

TRANSFORMATIVE ENTERPRISE SOLUTIONS.

Quanika is transforming enterprises globally, opening pathways that orchestrate business performance and deliver on the full promise of integration, removing silos and enhancing digital and physical workspace efficiency.

Quanika works with customers to transcend the challenges of accumulated complexity, simplifying systems and making them easier to control, to operate and to adapt.

Building performance through strategic partnerships

We work with systems integrators, consultants, and end user enterprises globally to leverage strategic partnerships with best-in-class tech vendors, including Axis Communications, HID, Mercury and Milestone.

Quanika's technology is available through open distribution, is easy to access and easy to work with. Our positive, can-do approach, and our 24/7 tech support, will help you build your future.

Our unrivalled experience of enterprise-wide systems integration brings together physical and logical systems, including access control, video, site safety, visitor management, and core corporate functions, to deliver optimum efficiency and value, letting you meet tomorrow's challenges, today.

Our solutions let you eliminate the inefficiencies of siloed systems and deliver insight and control, for lasting advantages.

The Quanika team will work with you creatively, to identify and solve your unique system challenges.

We deliver the most efficient solutions, ensuring secure and productive connections between people, physical infrastructure and corporate systems.

OUR MISSION, OUR VALUES, OUR PROMISE:

Quanika's mission is to deliver on the true promise of integration, giving our customers the powerful but affordable solutions, they need to protect themselves, and to prosper.

Our success is built on making that vision a reality for all of our customers and fulfilling that promise.

Collaboration

We work closely, respond quickly, and succeed together.

Knowledge

Real-world insights and experience drive all our innovations.

Creativity

We pride ourselves in providing creative, logical, elegant solutions.

Satisfaction

We look for the best in everything we do, and find satisfaction in success.

Global Reach

We are dedicated to serving local markets, with a global reach.

ACCESS CONTROL, REDEFINED

ELEVATING SECURITY, WITH FACE ID

Unlock the full potential of access control with FACE ID, a simple yet versatile solution that leverages the power of mobile facial verification technology.

FACE ID offers a seamless and secure authentication process. Users simply enroll in advance, allowing for quick and hassle-free access to secured areas.

Experience the convenience of access control at your fingertips. FACE ID is available for download via a link on both Google Play and the App Store, ensuring compatibility with a wide range of mobile devices.

FACE ID goes beyond facial recognition alone, offering multi-factor authentication options such as dynamic QR codes, PIN codes, and passwords. This layered approach to security ensures robust protection against unauthorized access.

Enrolling with FACE ID is quick and straight forward. Users can easily register their facial biometrics in advance, eliminating the need for time consuming on-site enrollment processes.

Say goodbye to access cards and key fobs. With FACE ID, users no longer need to carry physical access credentials, reducing the risk of loss or theft.

FACE ID operates alongside and without the need for traditional physical readers, offering cost-saving advantages for organizations. By leveraging mobile technology, FACE ID streamlines the access control infrastructure, reducing installation and maintenance costs.

Seamlessly integrated with our core software modules, FACE ID can be deployed as part of a unified solution with access control, time and attendance tracking, visitor management, and more. By combining FACE ID with Quanika's software suite, organisations can achieve unparalleled efficiency and security.

FOR A RANGE OF APPLICATIONS

From corporate environments to healthcare facilities, educational institutions, transport hubs, and beyond, FACE ID is designed to meet the diverse security needs of modern organisations. Its versatility and adaptability make it ideal as a standalone solution, or integrated with Quanika's software modules for a wide range of applications.

Access Control

FACE ID works standalone, but also integrates seamlessly into access control solutions, for a wide range of facilities. Its advanced facial verification technology ensures efficient authentication, enhancing overall security and convenience for users.

Time & Attendance

Streamline time and attendance with FACE ID's integrated functionality. By utilising facial recognition technology, FACE ID supports accurate and reliable attendance tracking, enabling organisations to effectively monitor employee attendance and optimise workforce management.

Visitor Management

Ensure the safety and security of your premises with FACE ID's visitor verification capabilities, alongside Quanika VisitorPoint. From verifying guest identities to managing visitor access permissions, FACE ID simplifies the visitor management process, providing peace of mind for both visitors and hosts.

ID Verification

Validate the identities of individuals with ease using FACE ID's ID verification functionality. Whether it's verifying student IDs in educational institutes or authenticating employee credentials in corporate settings, FACE ID offers a reliable solution for identity verification purposes.

Mustering

Facilitate efficient emergency response procedures with Quanika's mustering capabilities. By accurately identifying individuals within a facility during emergencies, FACE ID helps organisations quickly account for personnel and ensure their safety.

and more.

UNIFIED SOLUTIONS FOR DIVERSE NEEDS

TAILORED TO EVERY APPLICATION

FOR ALL PERSONNEL

Whether it's patients in healthcare facilities, students in educational institutions, residents in complexes, staff members in corporate offices, or VIPs in government buildings, FACE ID is designed to meet the diverse security needs of personnel across various industries.

Staff & Contractors

Employees and contractors require efficient access control solutions to perform their duties effectively. FACE ID offers a reliable authentication method for staff members and contractors, enabling seamless access to designated areas while maintaining security protocols.

Visitors & Deliveries

Managing access for deliveries and visitors can be a challenging task for businesses. FACE ID simplifies the visitor management process, allowing organisations to verify guest identities and grant access permissions quickly and securely.

Residents

Residential complexes require effective access control measures to ensure the safety and security of residents. FACE ID provides a user friendly access control solution for residential communities, allowing residents to securely access buildings and amenities with ease.

Students

Educational institutions face the challenge of managing access for students, faculty, and staff. FACE ID offers a seamless access control solution for schools, colleges, and universities, streamlining entry procedures and enhancing campus security.

Patients

In healthcare settings, ensuring the safety and privacy of patients is paramount. FACE ID provides a secure and convenient access control solution for healthcare facilities, allowing authorized personnel to access restricted areas while maintaining patient confidentiality.

VIP'S

High-profile individuals such as VIPs and government officials require heightened, tailored security measures. FACE ID offers advanced facial recognition technology to ensure the security and integrity of restricted areas, providing VIPs with a secure access control solution.

A SIMPLE, YET VERSATILE SOLUTION

Embrace simplicity with FACE ID, the ultimate mobile access control solution, that combines ease of use with unparalleled versatility.

No readers or physical cards required

Say goodbye to traditional access cards and cumbersome readers. With FACE ID, users can access secured areas using just their mobile device. FACE ID eliminates the hassle by storing access credentials securely on users' mobile devices, ensuring easy access without the need for cards.

Minimal Installation

Skip the complex installation process. FACE ID operates seamlessly without the need for extensive setup, ensuring hassle-free deployment and minimal disruption to your organisation.

IP based system

Utilising an IP-based system, FACE ID seamlessly integrates with existing solutions, providing a secure and reliable access control solution without the need for additional hardware.

Only requires controller connections

Simplify your access control infrastructure. FACE ID only requires a controller connection, reducing complexity and streamlining the authentication process for both users and administrators.

Seamless and easy use

Enjoy a seamless user experience with FACE ID's intuitive interface and easy-to-use features. From enrollment to use, FACE ID ensures a smooth and effortless experience for all users.

Flexibility to combine with other software modules

Stay ahead of the curve with FACE ID's flexibility to combine with new Quanika features and functionalities. As your security needs evolve, FACE ID can be adapted to meet your requirements, ensuring that your access control solution remains up-to-date and future-proof.

A STREAMLINED SOLUTION FOR YOUR SPACES

ENROLLMENT PROCESS

Our intuitive system ensures swift setup, allowing users to initiate secure access control. Upon registration, users receive a download link for the App Store or Google Play Store, accompanied by a registration email containing essential details and a QR code.

With just a few straightforward steps, users can establish their facial verification and PIN or passcode within the app, making FACE ID readily available for secure access anywhere, anytime.

QUICK AND EASY ENROLLMENT

FACE ID: USE ON SITE

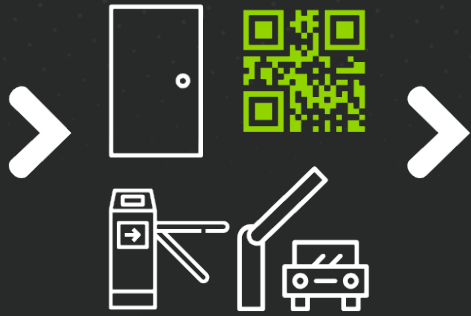

Upon arrival at the site, users can effortlessly initiate secure entry or exit using the FACE ID mobile app. Entry points such as doors, gates, and barriers will display dynamic QR codes, which users can quickly scan using the app.

With additional multi-factor authentication completed, entry is granted, ensuring a smooth and secure access experience. Whether it's one entry point or multiple areas within a site, FACE ID's versatility means it can be applied to meet your access control needs efficiently.
