

VisitorPoint

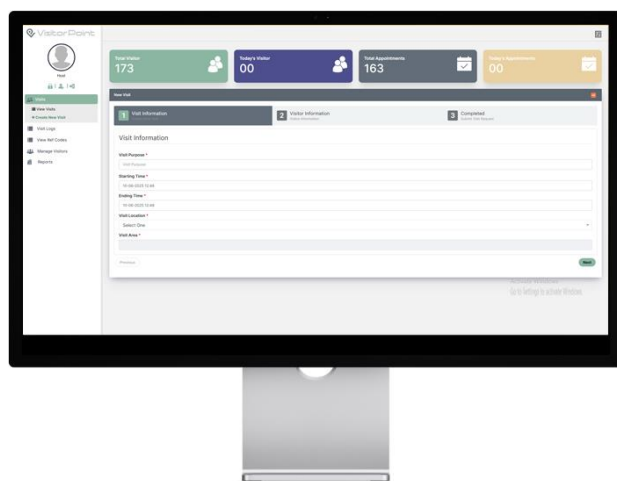

Quanika's proven technology lets you transform your visitor and employee experience - and your wider operations - by combining your security, safety, reception, and analyst functions in a single, powerful, flexible solution. With VisitorPoint, you'll know exactly who is on site, where they are and when their access authorizations apply, for both your physical spaces and your corporate networks

VisitorPoint integrates seamlessly with established business processes and software including Microsoft Outlook - making it easy for all authorized members of your management teams to use it. From booking meeting rooms and sending visitor access permissions to guests, to allocating courtesy parking, VisitorPoint puts your people in control and lets them work more efficiently. And it lets your organization adapt to changing workflows and patterns of building use, with the ability to automatically update access permissions from your central staff database.

4 Step Process To Manage

- Pre-Registration.
- Confirmation sent out.
- Attending meeting
- Meeting Finishes

With VisitorPoint you can make sure your staff, contractors and guests enjoy a smooth, hassle-free welcome every time they arrive on site. With delay-free access, clear information and helpful signposting delivered in advance, and no longer any need to wait in busy reception areas, you know they'll be impressed even before they arrive.
